

RWD

Class 3

Remaining Case Studies

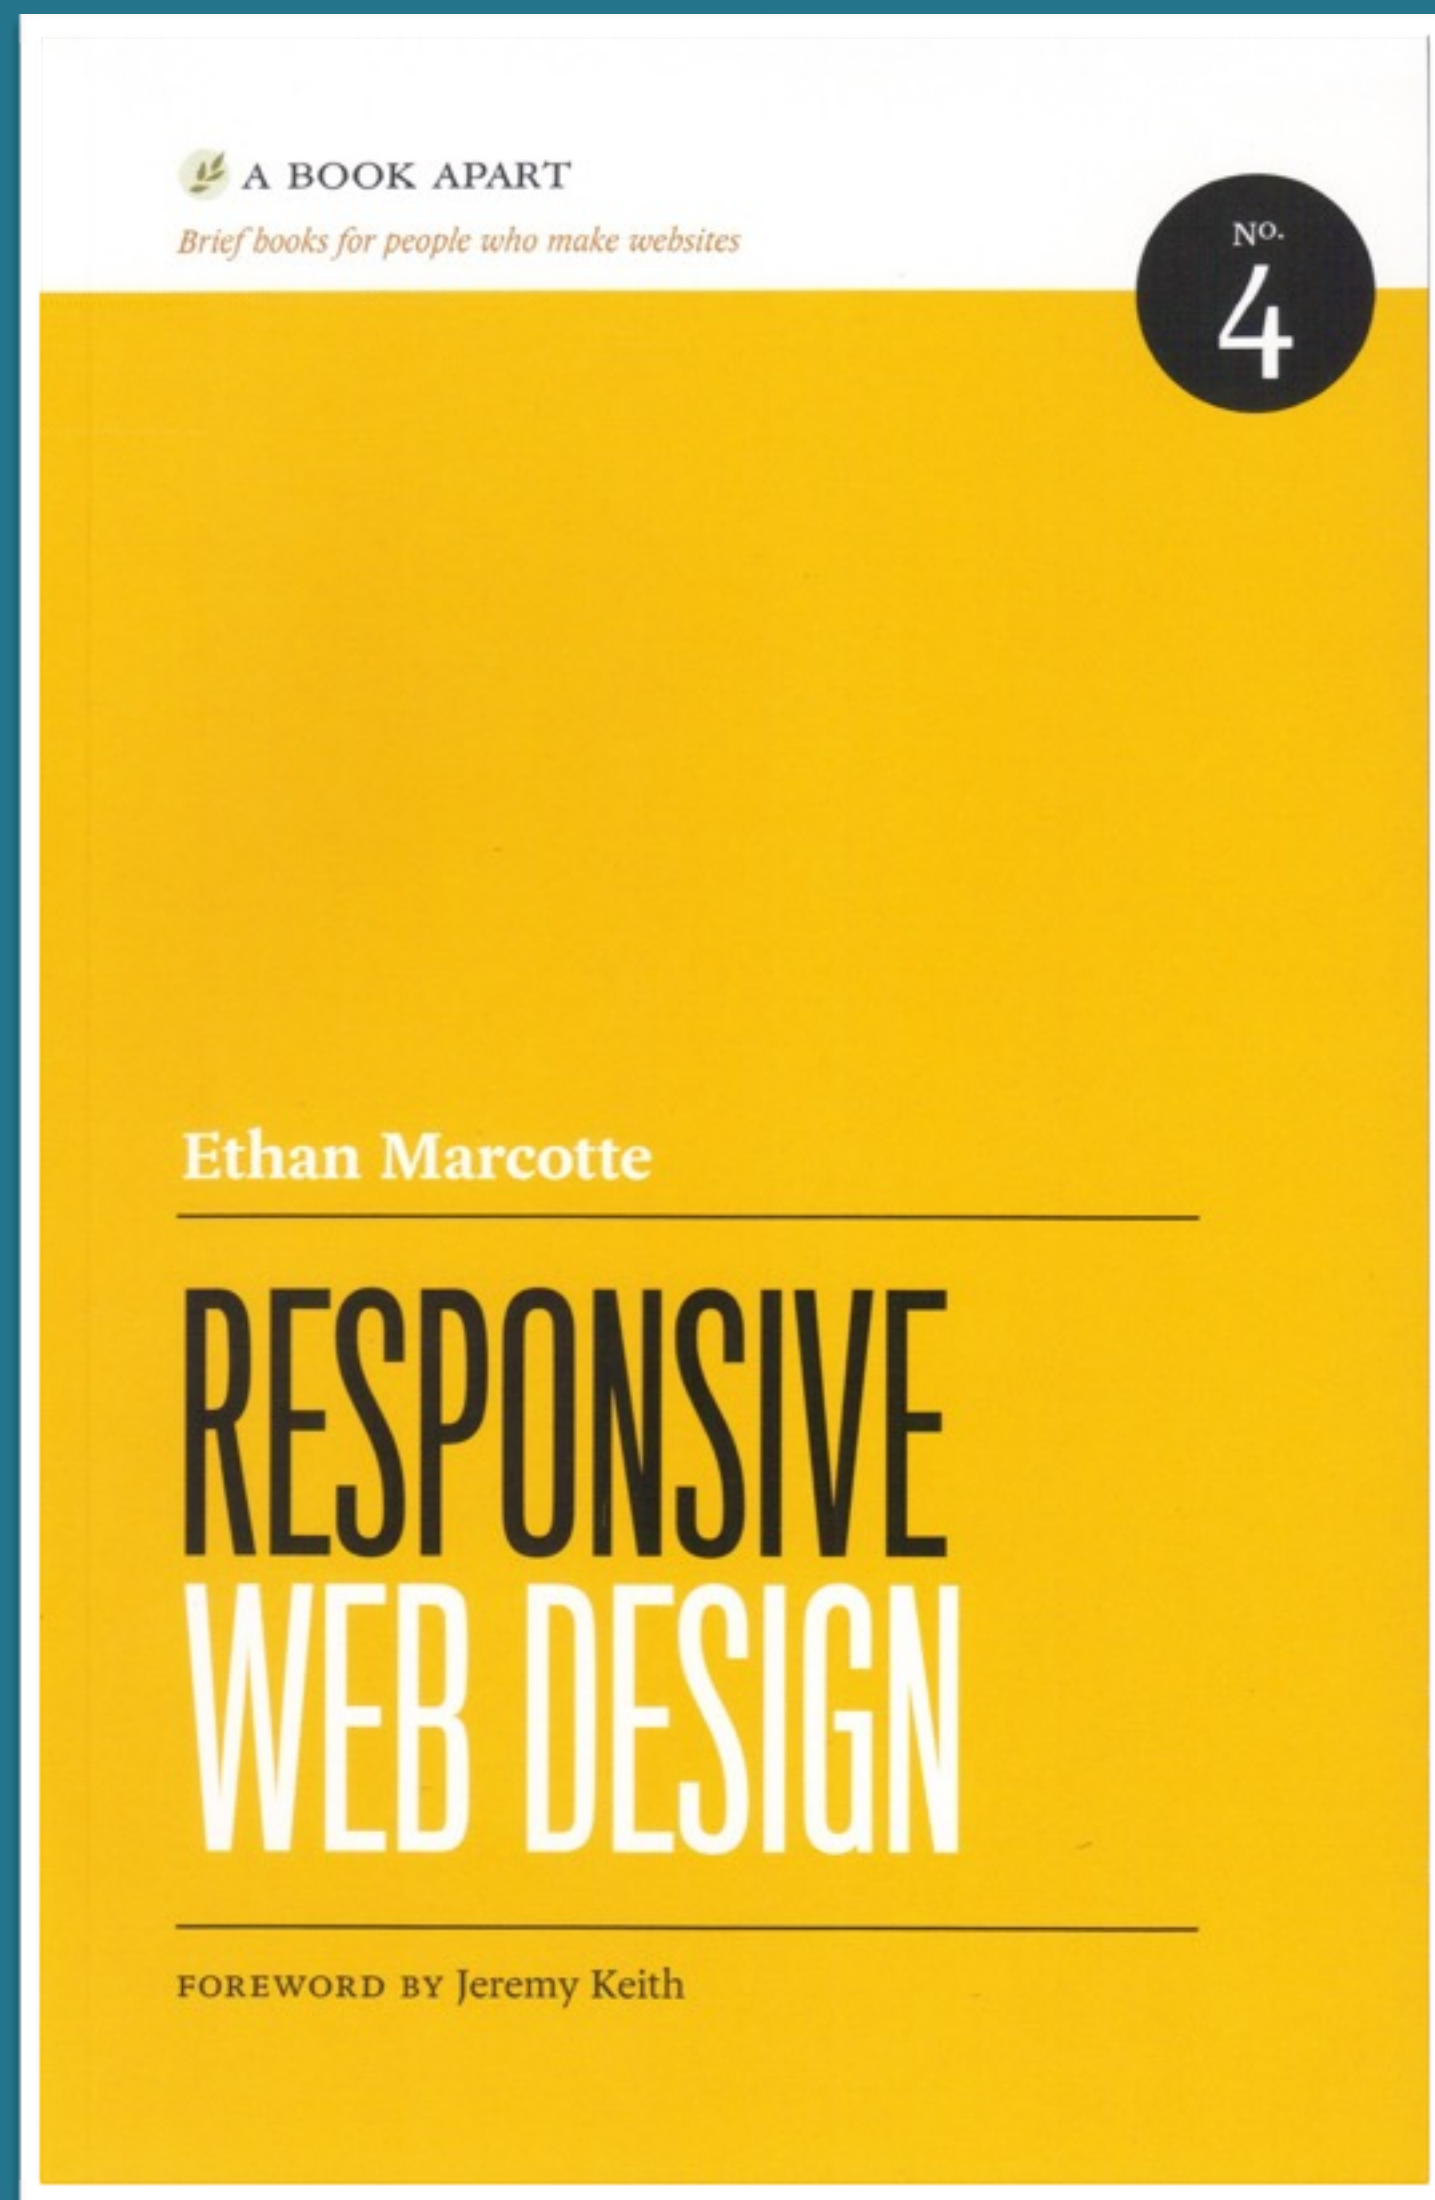

HTML Basics 1 Review

HTML: Lists & Links

RWD Book

Why does the concept of the canvas, used in print design, not translate well to the web?

How does Marcotte compare
traditional architecture to the web?

What challenges do separate
mobile/tablet experiences present
vs. using responsive design?

Process & Design

Who is a website for?

What is a site map used for?

What are some
ways to achieve
visual hierarchy?

SIZE

STYLE

COLOR

What are some
ways to group
information?

Proximity

Headings

White Space

Alignment

Borders

Color

Consistency

How do we create effective site navigation?

Concise

Context

Clear

Interactive

Selective

Consistent

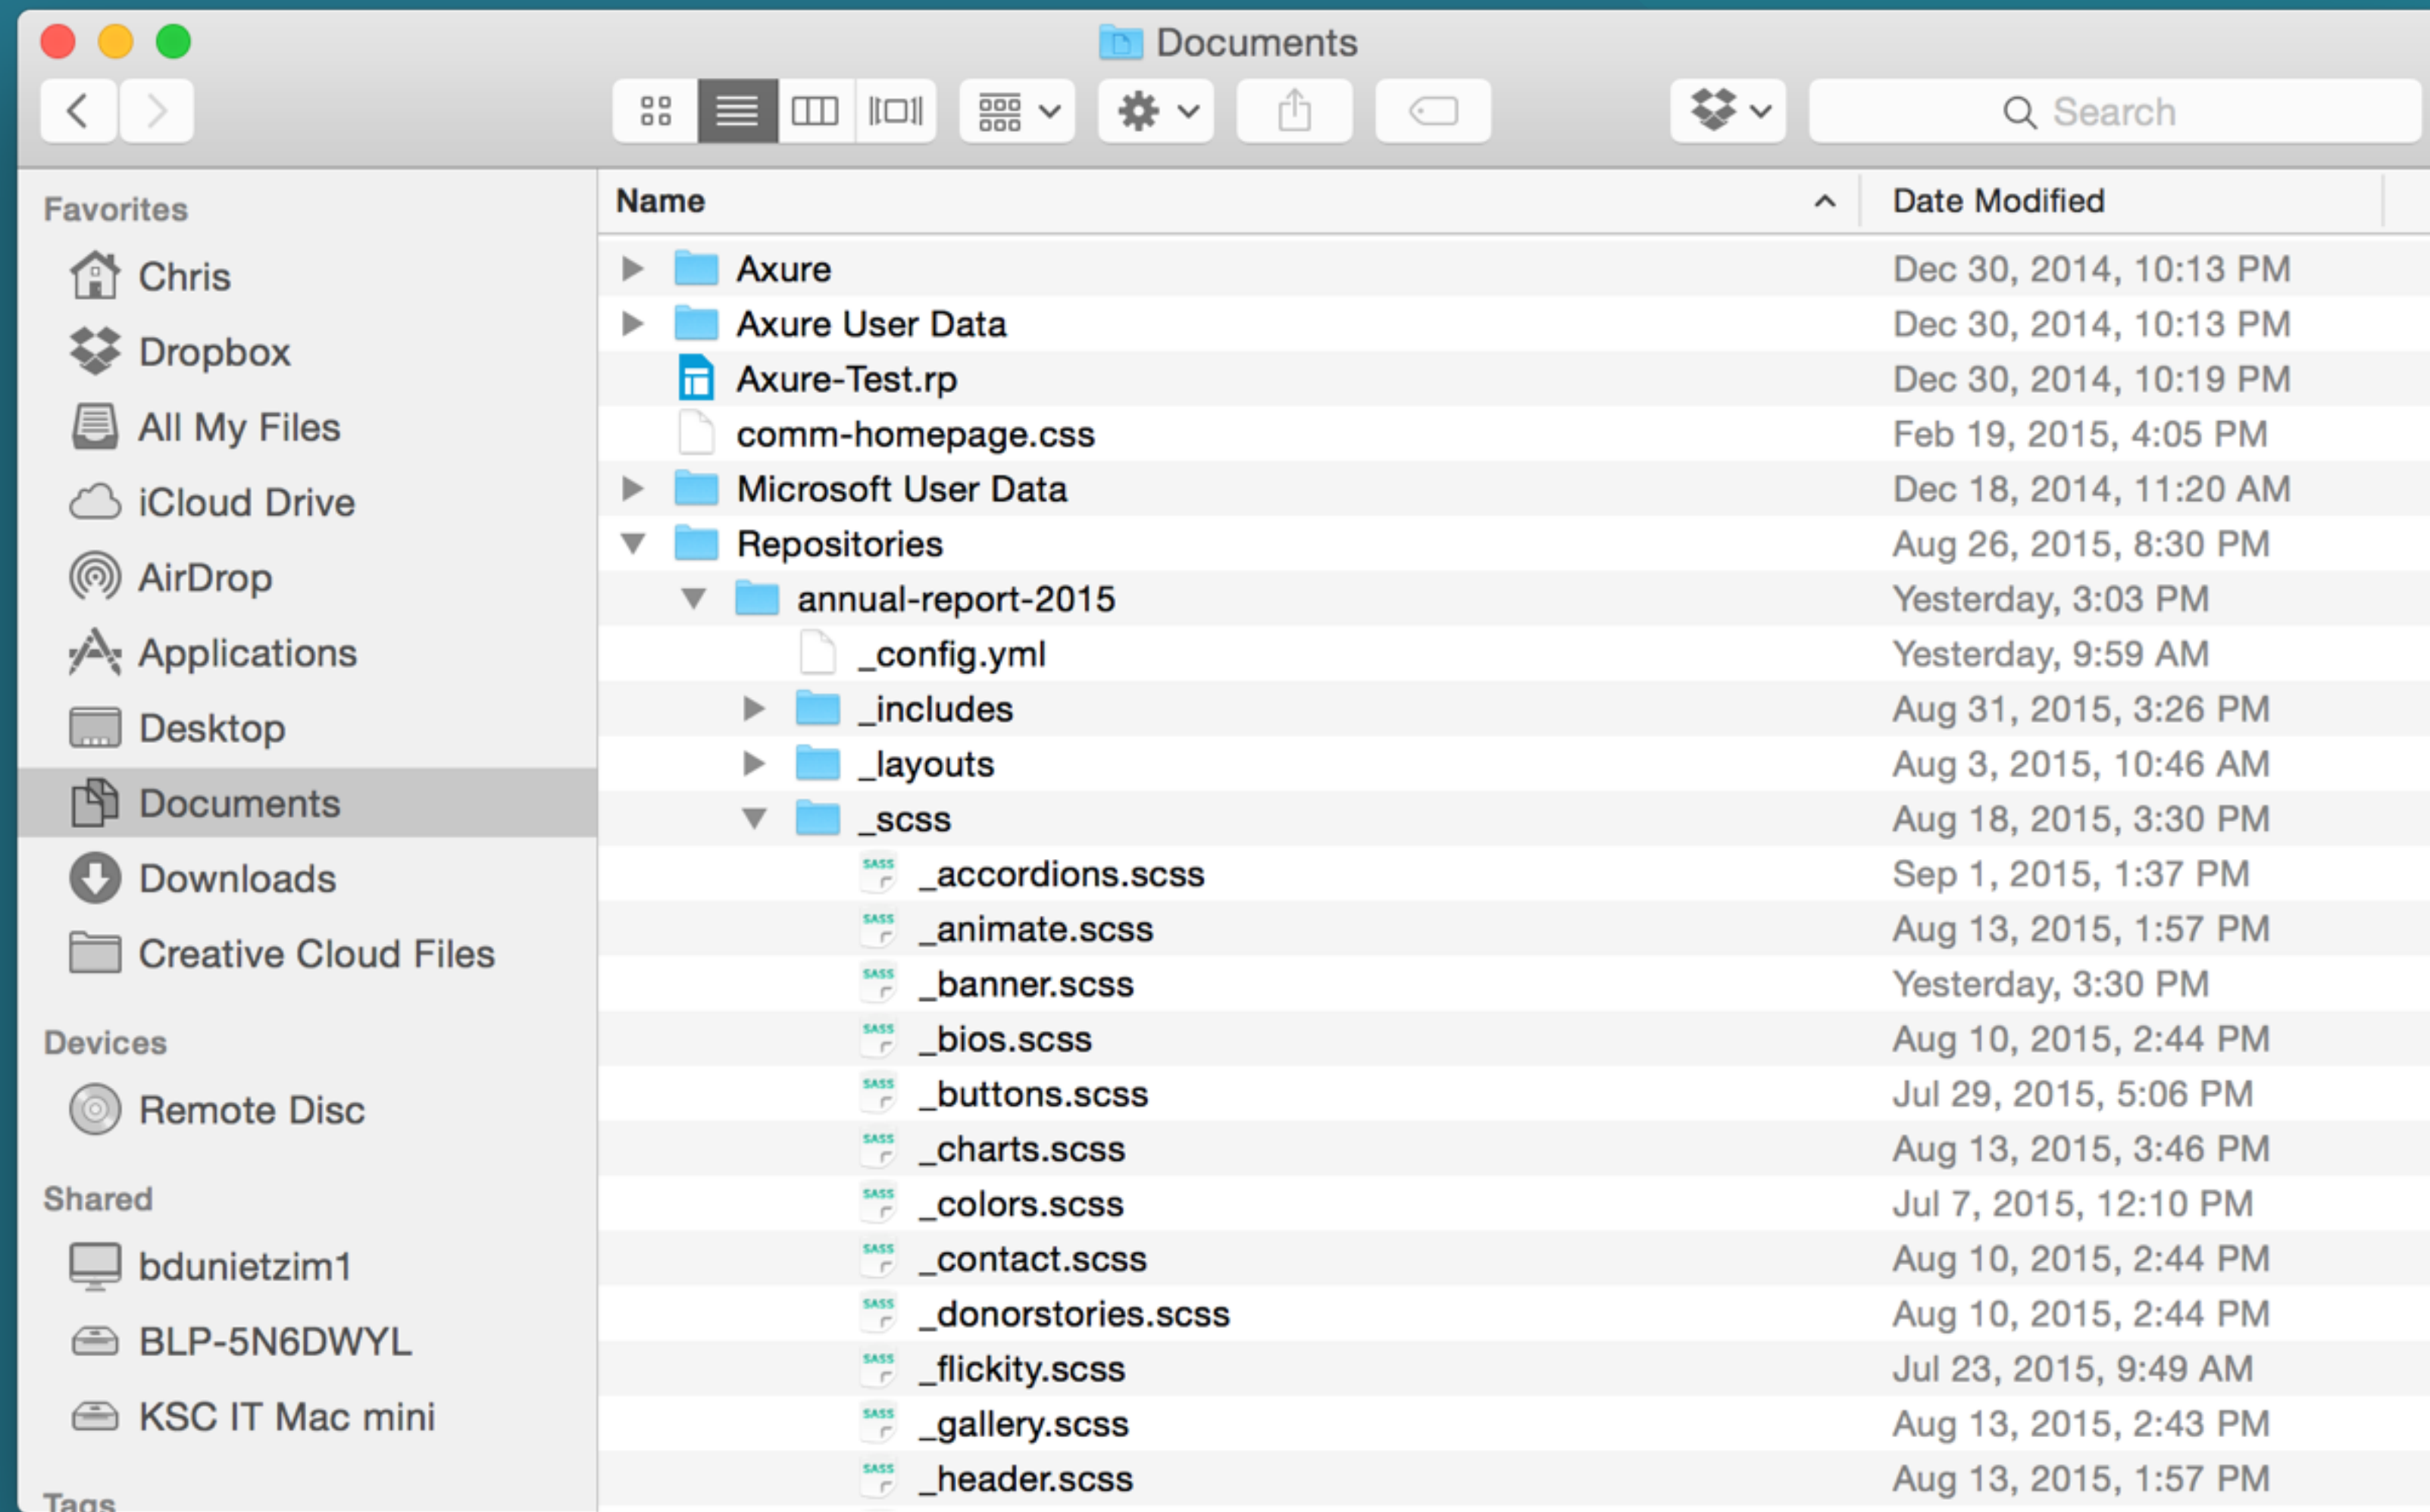

File Paths

**Files and folders
(directories) are organized
in a tree hierarchy.**

**What is the difference
between absolute and
relative file paths?**

```
<a href="linkhere.html">Click Me</a>
```

```
<a href="http://www.kent.edu/about">Click Me</a>
```

**How do you link to a file in a
folder/directory above the
current folder?**

```
<a href=" ../linkhere.html">Click Me</a>
```

User Research

How Do We Identify Top Tasks?

Who is responsible for user research?

What are some research techniques?

Competitive Analysis

Hands-On: Setup GitHub for Assignments

**GitHub is a place where
people can store code and
other documents.**

It uses a technology protocol call “Git” to update and make changes to projects. Git is a method of version control.

**Git is a command line tool.
However, software is
available that makes Git
easier to use. One is called
GitHub Desktop.**

GitHub offers a free service called GitHub Pages, which allows you to host static websites for free.
